1. POLICY STATEMENT:

_____ conducts medical screenings of prospective employees for the following purposes:

(1) To confirm that employees meet minimum physical requirements of jobs for which they are hired; and

(2) To identify, and not further aggravate an existing medical condition or manage effectively, and/or accommodate preexisting medical conditions.

2. PURPOSE:

This policy describes the medical screenings required to ensure prospective employees are physically able to safely carry out the requirements of the position for which a contingent offer of employment has been made.

3. SCOPE:

This policy applies to all _____ entities and its wholly owned or controlled subsidiaries.

4. PROCEDURE:

a. All offers of employment are contingent upon medical screenings to ensure the prospective employee is physically able to safely function at the job level applied for. The following steps are taken after a contingent offer of employment has been made:

(1) Review of Workers' Compensation records;

(2) Drug screening;

(3) Physical exam with immunization screening;

(4) Physical Agility Test; and

(5) If indicated, review of 5 years past medical history.

b. Upon successful clearance of the medical screenings by a _____ approved Occupational Medical Clinic, the prospective employee is considered physically able to perform the essential functions of the position.

c. Applicants are advised when they complete the online application process if successful clearance of a medical screening is required as a condition of employment. Employee Health or Human Resources maintains a list of the positions requiring post-offer physicals. The list is modified as requested by Department Directors, subject to the approval of Employee Health or Human Resources. This requirement of a post-offer physical exam also applies to existing employees who are transferred or promoted to a different position or job level.

d. The applicant is supplied with authorizations and instructions pertaining to the physical, which is conducted by a _____approved Occupational Medicine Clinic at _____ expense. Successful clearance of a post-offer physical exam is the final step in the hiring process for these designated positions.

e. The physical exam may include the following:

(1) Signed documentation of receipt of Description of Physical Demands and signed documentation of accommodation status. If accommodation is requested, personnel in the Employee Health Department contact HR/Talent Acquisition to discuss the accommodation request. If the accommodations are acceptable to the supervisor and pose no direct safety threat, proceed to step 2.

(2) Make copy of photo identification and proceed with obtaining a urine specimen following Department of Transportation standards. If the result is Non-Negative, the specimen is sent for confirmation. Once the result is returned from the lab, the Medical Review Officer ("MRO") reviews any "positive" results and makes the final determination of the urine screen for drugs. If the urine drug screen is positive due to abuse of non-prescribed controlled substances or Mood Altering Substances, the applicant will not be considered for employment. If the urine test is negative, proceed to step 3.

(3) If not contraindicated by the five (5) year medical history review or the physical exam, complete the physical agility test or equivalent assessment. If the result does not meet the level required by the job, the post-offer exam is stopped. If the result meets the level required, proceed to step 4.

(4) After the previous three (3) steps are completed, a licensed medical provider verifies, by signature, that the applicant does or does not "meet the physical capacity required to perform the essential position functions of the department as indicated, without restrictions."

f. In line with Americans with Disabilities Act (ADA) guidelines, all tests and examinations conducted are position-related and consistent with business necessity. Therefore, in the event of a contingent offer of employment being rescinded based on limited physical capacity or a medical condition, _____ utilizes the post-offer examination results to show that the prospective employee was screened out for a safety reason and considered a direct threat to themselves, other employees or patients.

g. The questionnaire and physical are recorded on forms specifically for that purpose.

h. If no significant physical limitations are indicated and hiring is recommended, the applicant is hired and the department supervisor is notified by HR.

(1) If the applicant is employable except for a disease or other condition that can be expeditiously corrected or controlled, he/she is informed that the condition has to be resolved before employment can be considered. If operational considerations within the hiring department permit the hiring delay, up to thirty (30) days are allowed for the applicant to control or correct the condition by the applicant's own physician at the applicant's expense. The applicant submits a written statement from his/her personal physician indicating resolution of the problem. If these requirements are met, the applicant is hired. If these requirements are not met, the applicant will not be considered for employment with ____ again for one (1) calendar year from the date of the failed physical examination.

(2) If significant permanent or long-term physical (or mental) limitations are noted, the HR director and the department director determine if an accommodation can be made that would allow the applicant to perform the essential functions of the position. The applicant is notified in a timely manner (not to exceed 72 hours).

i. Pre-employment/post-offer physical examination documentation is maintained in the Human Resources Department, it is treated as a confidential medical record and kept in a file separate from the individual's personnel record. Information may only be disclosed to supervisors and managers about necessary restrictions and accommodations affecting the work or duties of the individual.
